

List of Qualified Solar Water Heaters Suppliers/ Installers

Version 26, dated December 21, 2021

General Notes and Comments:

- This list is issued by the Lebanese Center for Energy Conservation (LCEC) based on a set of criteria translated into a grading system.
- Companies are listed in alphabetical order.
- The list is not in any way a guarantee on quality but merely an interpretation of their certifications and the past performance of the companies. The client is responsible to check what the company is installing for him/her.
- Company ratings range between 0 and 3 stars. A 3 Stars rating corresponds to a well-established and experienced company while 0 Stars rating represents a company that is in the beginning of the growth stage.
- Product ratings range between 0 and 3 stars. A 3 Stars rating corresponds to high-end certified product while 0 Stars rating represents an acceptable product.
- Qualified Systems are generally endorsed by LCEC.
- Passing Systems are generally acceptable but not recommended by LCEC.

Warnings

- Attempting to use the list in an unethical manner or using the subsidy and soft loan to market anything other than solar water heating will result in immediate blacklisting of the company in all current and future activities related to the Ministry of Energy and Water and the Lebanese Center for Energy Conservation.
- Customers who willingly install systems which are not solar water heaters using this soft loan will be charged an interest of a standard bank loan.
- It is the company's responsibility to keep checking the validity date of its products' certificates. If LCEC finds any certificate to be outdated, the corresponding product will be re-evaluated without warning.
- Water stored in galvanized tanks is not suitable for drinking and cooking.
